

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience within a high-growth, product-driven SaaS environment, focusing on feature development, system reliability, and product improvements. Contributed to WCAG 2.1 AA accessibility compliance, security enhancements, and CI/CD stability in production environments. Skilled in JavaScript, TypeScript, and C# with experience building and maintaining scalable features.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, C#, C, C++
- **Frontend:** Ember.js, React.js, HTML5, CSS3, SCSS, Bootstrap, jQuery
- **Backend & APIs:** REST APIs, .NET, Entity Framework (EF Core)
- **Database:** MySQL, PostgreSQL
- **Core Concepts:** System Design, Performance Optimization, OOP, Accessibility (WCAG 2.1 AA)
- **Tools:** Git, Selenium, CI/CD
- **AI & Emerging Tech:** Generative AI, AI Agents, MCP (Model Context Protocol)

WORK EXPERIENCE

Deltek | Replicon, Bangalore (Remote)

Associate Software Engineer | 02/2023 – Present

- Led UI rebranding of the Replicon’s core timesheet and time-tracking product and implemented WCAG 2.1 AA standards, achieving 85%+ compliance, improving design consistency and enhancing customer experience.
- Resolved 80+ production and non-production bugs, including high-priority customer-reported issues, strengthening system stability and reliability.
- Leveraged Generative AI tools to accelerate unit test generation, reducing manual coding and research time by 65%.
- Built 10+ complex features across reporting and timesheet modules used by thousands of enterprise organizations and over 1.5 million users across 70+ countries.
- Engineered a monetization-driven architectural change by separating project integration capabilities into a standalone product, driving adoption of the new offering.
- Resolved CI/CD pipeline failures (AWS CodeBuild, test suites), improving release stability.
- Automated test scripts using Selenium, expanding test coverage and ensuring the stability of new feature rollouts.
- Performed code reviews and debugging to improve code quality and reduce defects.
- Eliminated 400+ critical and high severity security vulnerabilities by proactively managing Dependabot alerts and dependency patches across 30+ repositories.
- Refactored code by removing obsolete feature flags, improving code readability and maintainability across modules.
- Collaborated cross-functionally with design, product, and QA teams to refine requirements, validate solutions, and ensure high-quality feature delivery.

Tech Stack: C#, .NET, JavaScript, TypeScript, Ember.js, Git, Selenium

Software Engineer – Intern | 07/2022 – 01/2023

- Investigated application logs to diagnose root causes of issues, enabling faster diagnosis and resolution.

EDUCATION

Bachelor of Technology – Computer Science and Engineering | 2018 – 2022 | Integral University, Lucknow | 89.2%

PROJECT

Smart Job Tracker Kanban Application | [Live Project](#)

Built a full-stack Kanban job tracker with LLM-powered autofill that extracts role and skills from job URLs, and a BFS graph-based skill gap analyzer that maps missing skills to personalized learning paths.

Tech Stack: React, TypeScript, C# .NET 8, PostgreSQL, Entity Framework Core, Llama, Gen AI, DSA, REST API
